Skills Summary

I am a determined and motivated team player who values attention to detail. I am compassionate and people oriented with a great love for providing superior quality care to my community. My strengths are in problem solving, assessments, and developing, implementing, and evaluating a plan of care. During my previous military experience, attention to detail was vital to the safety and lives of my fellow sailors which would be an asset in the healthcare setting. I look forward to starting my career in this honorable and respected field.
