Experienced nursing professional with 7 years as a charge nurse in skilled nursing facility and sub-acute nursing facility with directly involved in patient care. A skilled communicator who works well in a team setting, able to coordinate care with other medical professionals as well as to work compassionately with each individual patient care. My experience providing compassionate care to diverse patient populations in a variety of settings and outstanding leadership and collaboration skills, utilize clinical knowledge in interpersonal and clinical nursing skills to join a care unit to become a valuable member of the team. Utilization of skills and knowledge in providing quality healthcare services will be a personal daily goal. Extensive knowledge of clinical protocol, deductive reasoning, oral communication, and team coordination create opportunities to expand the practical experience, while at the same time providing quality healthcare and discharging duties effectively. Patients focus within medical practice brings experience, care, and extensive knowledge to help improve the lives of patients. Eager to utilize experience working in high-stress situations, specifically in the critical care unit as well as in other fields. Provided accurate and complete SBAR handoff report and supported the accepting team with transfer and transition of patient care.

Qualifications: Extensive nursing care experience, Exceptional skills in individual patient needs assessment, Good organizational and time management skills, Strong proficiency in a variety of medical procedures including sample collection, wound dressing, IV insertion, Vital signs monitoring, and infection control, highly flexible scheduling availability, Committed to compliance reporting, critical thinking skills, and good in oral and written communication skills

Professional Experience:
